Your puppy guarantee:

All puppies purchased from 6pk cattledogs have a lifetime guarantee against genetic defects. If during your testing you find a problem with your puppy contact me within 2 weeks of the findings. I reserve the right to second opinion at buyers expense. If there is a genetic defect with the puppy I require the puppy be spayed/neutered, or require the puppy be sent back to me at buyers expense. Depending on the defect. I do require that the puppies registration be signed over to me and returned to me. Once this has been done. I will replace your pup with one of equal value. If I do not have a puppy at that time you will be put on the waiting list for my next litter. I am not responsible for any cost of testing or medical care. And I will not give cash refunds For any reason. All 6pk puppies have been BAER tested, examined, Vaccinated & Wormed by a veterinarian. We start there vaccinations at 6 weeks old and then they are vaccinated every 3 weeks until they are 15 weeks of age. I only feed Purina Pro Plan dog foods to all my dogs, *Due to the varying kinds of food and different environmental conditions the puppies come in contact with; and the fact that all puppies have immune systems that take time to mature, the terms of this guarantee may not be honored unless they are given NuVet Plus® immune system builder, as directed by the manufacturer, for the first year. We also highly recommend you continue to give your pet NuVet Plus beyond the guarantee period to promote optimal health for a lifetime.* so you get the healthiest puppy possible. When you get a 6pk puppy you are getting the very best. It is up to you to keep it that way. Remember a puppy is a lifetime commitment and should be treated as such. You get back only what you put In that is why we use only the best.

All puppies purchased from 6pk are welcome back If for any reason you are unable to keep your dog contact me first so I may find another appropriate home for it. If for any reason you are unhappy with your dog contact me immediately so that I may have a chance to remedy the problem.

Vaccination schedule:

I have started your puppy on their vaccinations it is up to you to keep them on the schedule to keep them protected and healthy there vaccinations and worming is as follows! Remember you can vaccinate yourself at home but the vaccinations you buy are not guaranteed by the manufacturer the only way to insure you are receiving the best possible for your pup is by going to your veterinary and having them take care of your pup.

- (1) **6 WEEKS** _____ DHLPP, Exam, _____ 1 BAER testing & EKG
DEWORMING: _____ Pyrantial _____ Virbantel
- (2) **9 WEEKS** _____ DHLPP WITH CORONA:
- (3) **12 WEEKS** _____ DHLPP, BORDETELLA, INFLUSNZA, LYME
- (4) **15 WEEKS** _____ DHLPP, BORDETELLA, INFLUENZA, LYME

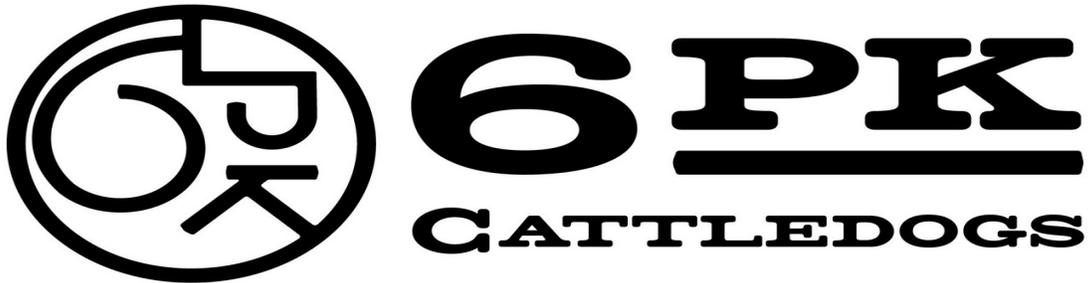

YOU HAVE COMPLETED YOUR PUPPY VAC'S TAKE YOUR PUP OUT & HAVE FUN!!

I highly recommend 4-H if you have children or basic puppy classes. It is a great way to socialize your pup and get them started on there way to being a great dog. Puppies love to learn and interact so take advantage of this time to teach bond you will never regret it.

6 MONTHS Time for RABIES _____

It is time to make your appointment for spay or Neuter, talk with your vet about the Ideal time for surgery.

Some vets will now go to 3 year vaccinations on DHLPP & RABIES
Bordetella should be done every 6 months (If around other dogs regularly)
Lyme & Lepto should be done yearly with well pet exams. Cattledogs love to catch and eat rodents so Lepto is important in this breed Do Not Skip It!
You should to have your dog examined yearly to ensure its health. Also bordetella and lime need to be boosted yearly! Consider having a complete blood work done on your puppy at a year old it is very helpful to head off problems if your doctor can see what is going on before a problem arises prevention is always less expensive then treatment!
And treatment cant always save your pet! Prevention can. Start your dog on Prevention ask your vet what is needed for your specific area! Save yourself time and money and use a name brand flea treatment on your pet if you are in a heartworm area consider using Revelation or Sentinel it kills and also protects your dog from heartworm in one application every month!
And remember I have an open door policy to all my dogs and buyers if you have any questions or concerns please ask I am here to help!

General information:

Puppies should not be considered fully vaccinated until they have completed their puppy vaccination schedule. They should not be taken to places where other dogs frequent like parks, rest areas, stores, keep them at home until they are done with their vaccinations for their own protection! Then by all means take them out and expose them to as much as possible the more you socialize your dog the better dog you will have! Keep them around people and teach them what is acceptable behavior and what is not. Everyone loves a puppy, no one likes being jumped on and chewed on by one! Never give them old shoes or socks to play with they do not know the difference between your old stuff and your new stuff. It is always better if they have their own toys to play with, and then if they are chewing on something of yours take it away and give them their own toys! This can save you much time and money in the future, not to mention headaches. Feeding a good quality food will also save you money in the future in vet bills. It will also give your dog a better quality of and longer life. Food does matter. If you never give your dog people food, they will never beg for it, and they will eat their own food that is balanced and formulated for their needs! Then you will not end up with an obese dog. It is much easier to never have a problem then it is to get the weight off of them when they are older. I feed free choice Purina Pro Plan Puppy food for the first year of life unless I have a pup that is getting heavy then it goes to meal feedings 3 times a day at 6 months old, but I keep them on puppy food for the first year, as well as using NuVet, Due to the varying kinds of food and different environmental conditions the puppies come in contact with; and the fact that all puppies have immune systems that take time to mature, the terms of this guarantee may not be honored unless they are given NuVet Plus; immune system builder, as directed by the manufacturer. We also highly recommend you continue to give your pet NuVet Plus beyond the guarantee period to promote optimal health for a lifetime. It is a good idea even if you are not trimming your dog nails to get them used to having it done so if you need to do them it is not a fight makes it a fun time and play with their feet allot so that they don't struggle to get away when you pick up their feet. Also lift their lips and look at their teeth, and get them used to having their face and mouth handled.

As a dog breeder, animal health is my top priority. That's why I enthusiastically recommend NuVet Plus immune system builder to all of my customers. Simply put, it is the best nutritional supplement available today.

To assure your puppy gets off to the right start, they have been enjoying NuVet Plus every day as a treat (they love the taste). Continuing this daily regimen is the easiest and best way to keep your pet on the path to perfect health!

Hundreds of thousands of dogs and cats are using NuVet to **support their immune system and provide optimal health.** A strong immune system will protect them from environmental and food toxins such as back yard pesticides, hormones, germs from public places, and even toxic formaldehyde in furniture and carpeting. NuVet Plus will not only protect but also help them maintain a **beautiful skin and coat.** This is not just a vitamin. It's an **immune system builder** with a precise balance of vitamins, minerals, omega fatty acids, amino acids and high-potency antioxidants. That's why it works so well through all three stages of a dog's life.

- ✓ **For puppies** - Fills the immunity gap all puppies experience. Shortly after birth maternal antibody effectiveness is greatly reduced. By 8 weeks your puppy's immune system is at a vulnerable point. Once in their new home, the immune system is weakened by the stress of adoption and exposure to novel bacteria and viruses in their environment. This is also when the vaccine series is started. Vaccines are most effective if the immune system can respond properly. Starting NuVet Plus now is important to helping your puppy grow into a healthy adult.
- ✓ **For dogs in their prime** - Improves the luster of their skin and coat while providing the necessary antioxidants, amino acids, vitamins, mineral and more to sustain their body's peak performance during the prime of their lives.
- ✓ **For older dogs** – Helps provide the nutritional requirements to help them live long, happy, and productive lives in their senior years.

NuVet is not available in stores, and is only available to the general public with an order code from an authorized pet professional.

For your convenience, you may order directly from the manufacturer by **calling 800-474-7044** and using **Order Code: 20573**, or ordering **online** at **www.nuvet.com/20573**. You can also save an additional 15% and assure you never run out of NuVet by choosing the "AutoShip" option at check out.

Please order prior to picking up your pup!
